

Corporate Finance & Securities

Our corporate and securities provide a wide range of services on behalf of private and public corporations. The bulk of our corporate work is transactional, including: securities (private and public offerings); corporate structuring and transactions; mergers, acquisitions and reorganizations; partnership structuring and restructuring; and public finance, including bond counsel and issuer's counsel representation. This area of practice also includes compliance with federal securities laws and state blue sky laws affecting the issuance of securities, as well as compliance with federal laws regulating the issuance of securities by investment companies, the registration and regulation of investment advisors, and the registration and regulation of broker dealers and compliance with the Trust Indenture Act of 1939. We also assist individuals and companies with their venture capital needs.
